CABALEN AUTO AIRCON · FINAL PROJECT

MOCKUP

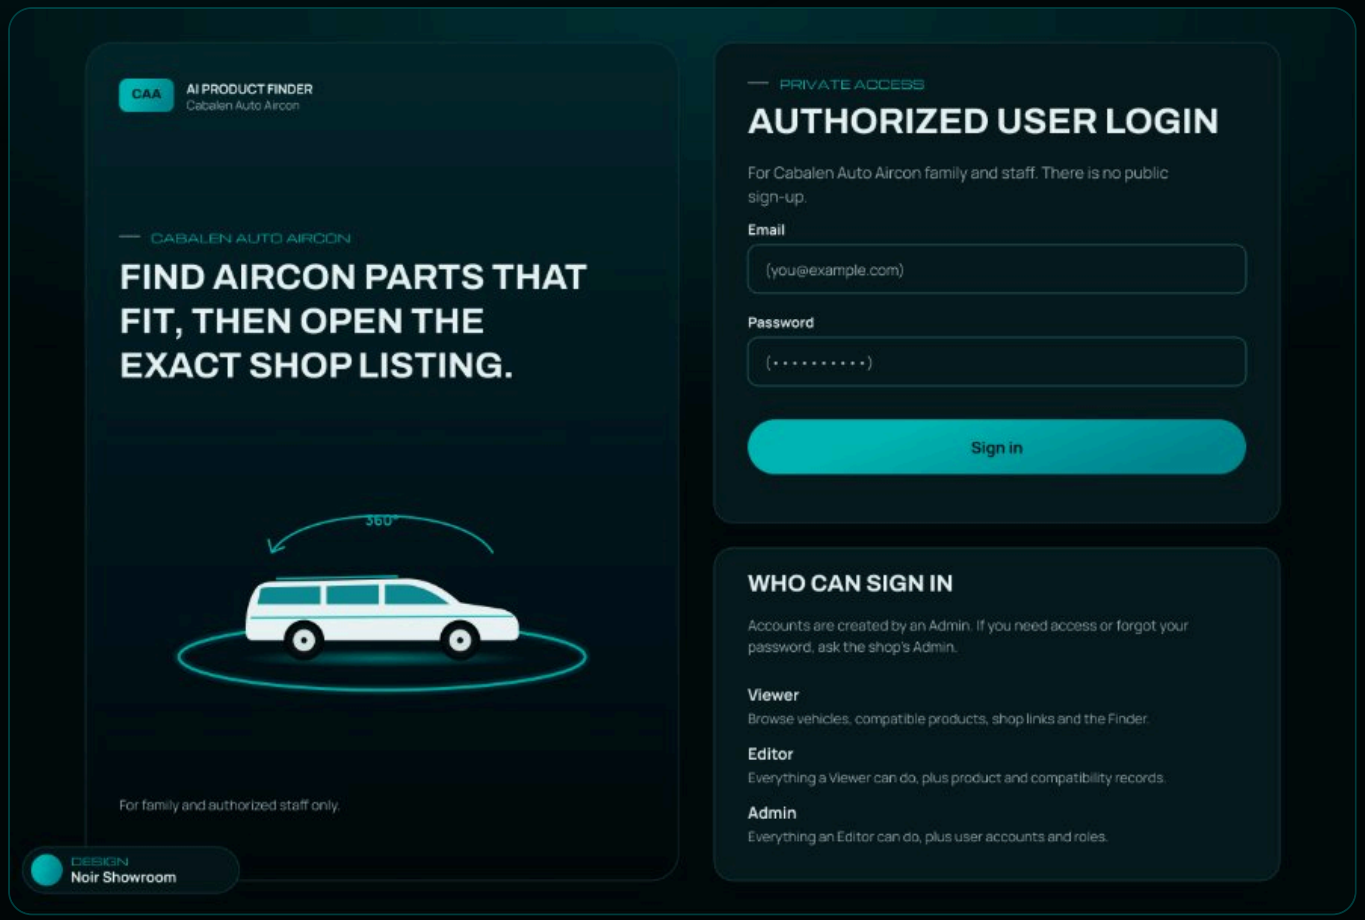

What the CAA AI Product Finder will look like: the wireframes painted in with the real colours, type, spacing and catalogue content. Eight desktop screens, one per screen in the revised proposal, plus phone views.

SOURCE	Figma file “CAA-AI-PRODUCT-FINDER”, high-fidelity frames
THEME	Noir Showroom (the app’s default)
REPO IMAGES	assets/mockup-01-login.png … mockup-10-phone-vehicle.png

LOGIN

In the proposal

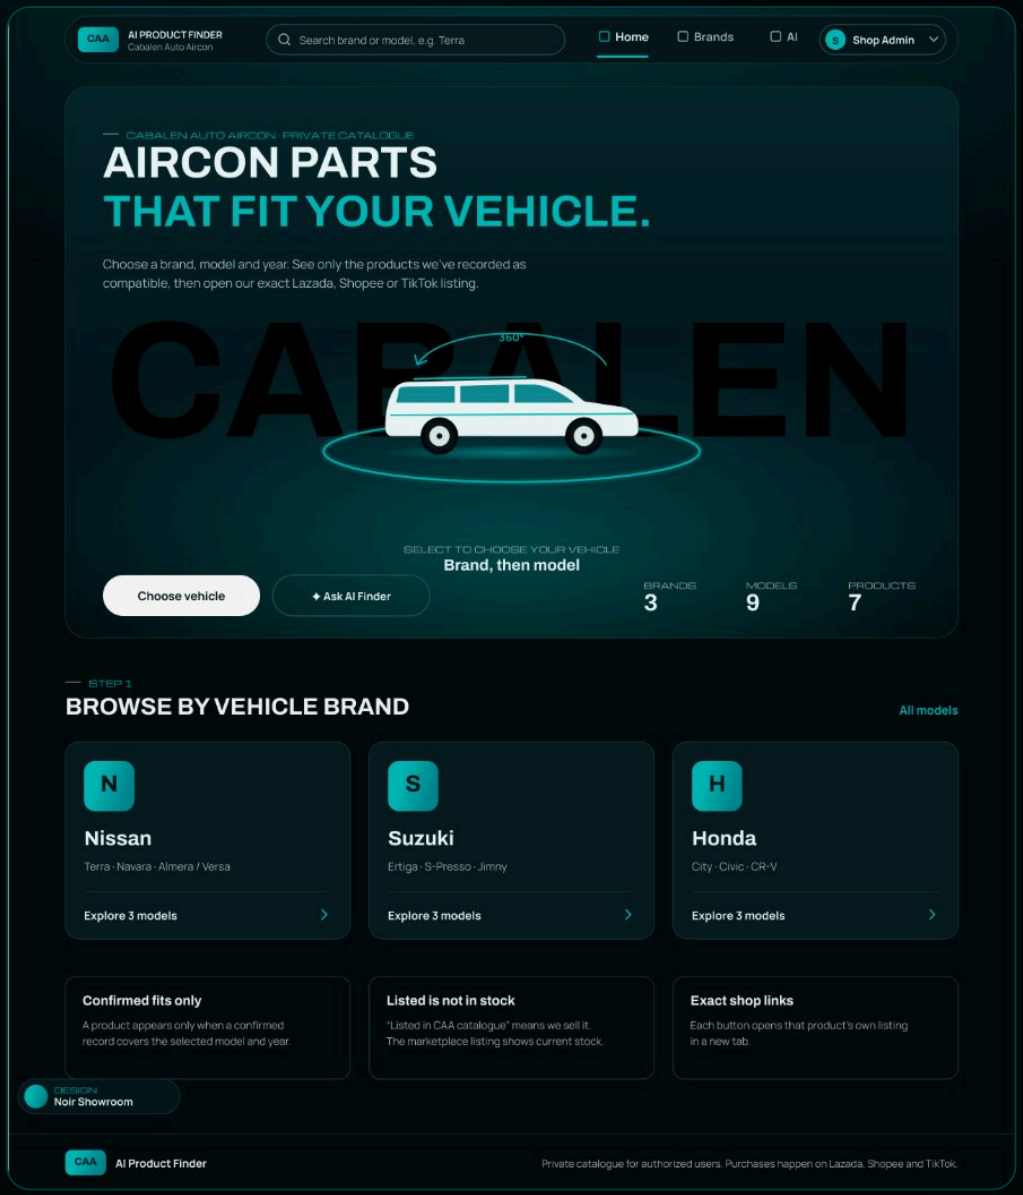

Private login. No public sign-up.

Real content shown

- Email and password form with a Sign in button.
- "Who can sign in" explains the Viewer, Editor and Admin roles.
- Brand panel: "Find aircon parts that fit, then open the exact shop listing."

`assets/mockup-01-login.png`

HOME

In the proposal

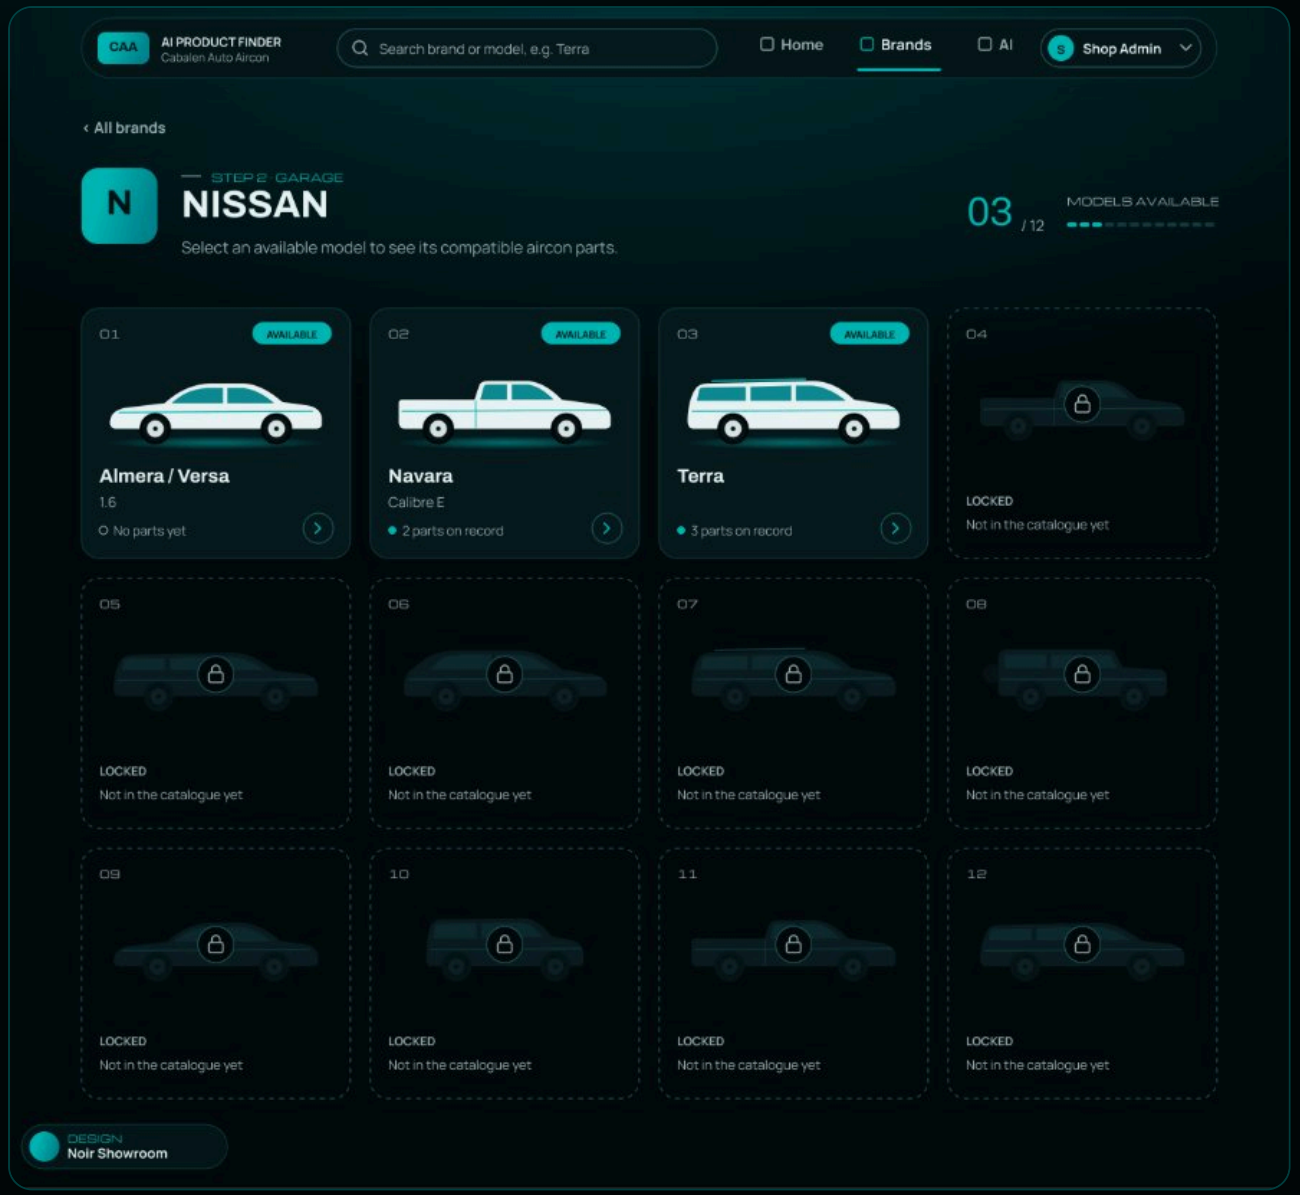

Home page with Quick Search, a 3D vehicle preview and brand cards you scroll sideways.

Real content shown

- Search in the header: “Search brand or model, e.g. Terra”.
- Hero: “Aircon parts that fit your vehicle”, with Choose vehicle and Ask AI Finder.
- Brand cards for Nissan, Suzuki and Honda with their model names.
- Three rules: confirmed fits only, exact shop links, keyword Finder.

`assets/mockup-02-home.png`

BRAND GARAGE

In the proposal

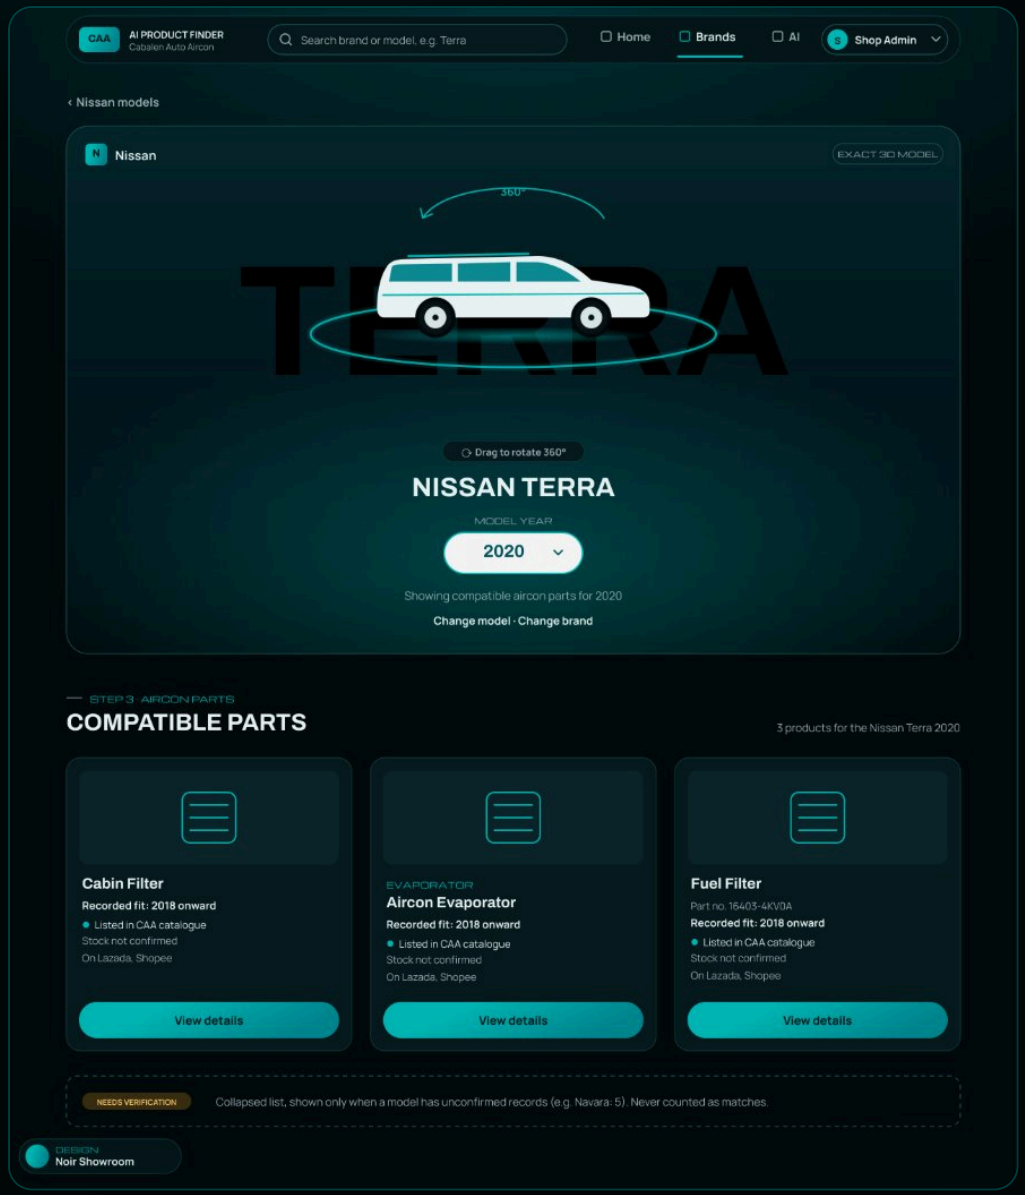

Brand garage: 12 slots, available models lit, the rest locked.

Real content shown

- Nissan: Almera / Versa, Navara (Calibre E) and Terra are available.
- Counter shows 03 / 12 models available.
- Nine locked slots, each “Not in the catalogue yet”.

`assets/mockup-03-brand-garage.png`

VEHICLE AND COMPATIBLE PARTS

In the proposal

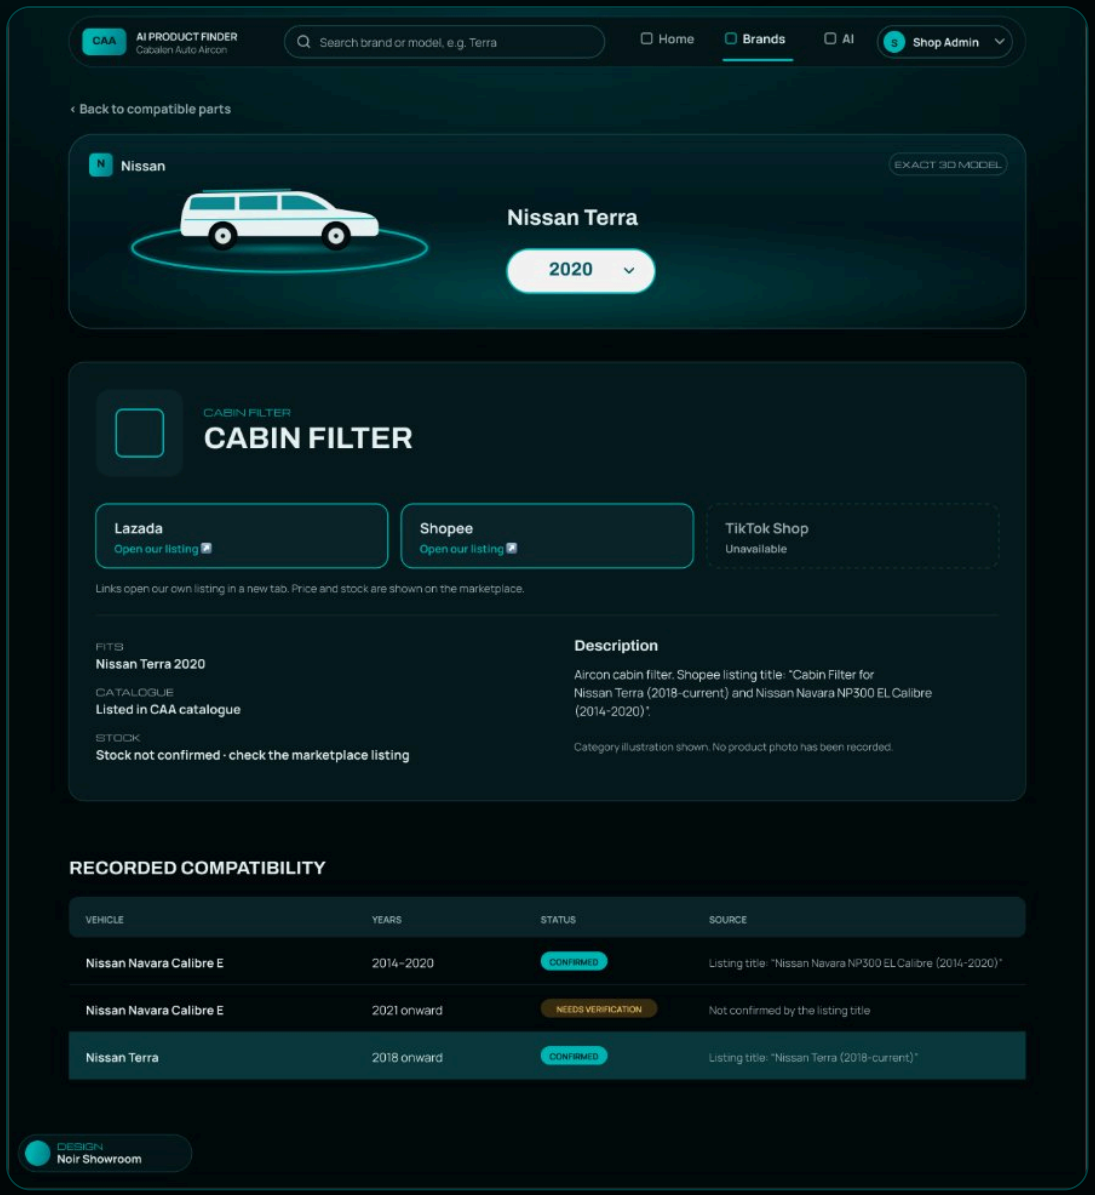

Vehicle page: model name, a year you can change, the 3D preview and the parts for that year.

Real content shown

- Nissan Terra, model year 2020, “Drag to rotate 360°”.
- 3 products for the Nissan Terra 2020: Cabin Filter, Aircon Evaporator and Fuel Filter (16403-4KV0A).
- Each card shows its recorded fit, catalogue status, stock and shops.
- A collapsed “Needs verification” bar, shown only when a model has unconfirmed records.

`assets/mockup-04-vehicle.png`

ITEM DETAILS

In the proposal

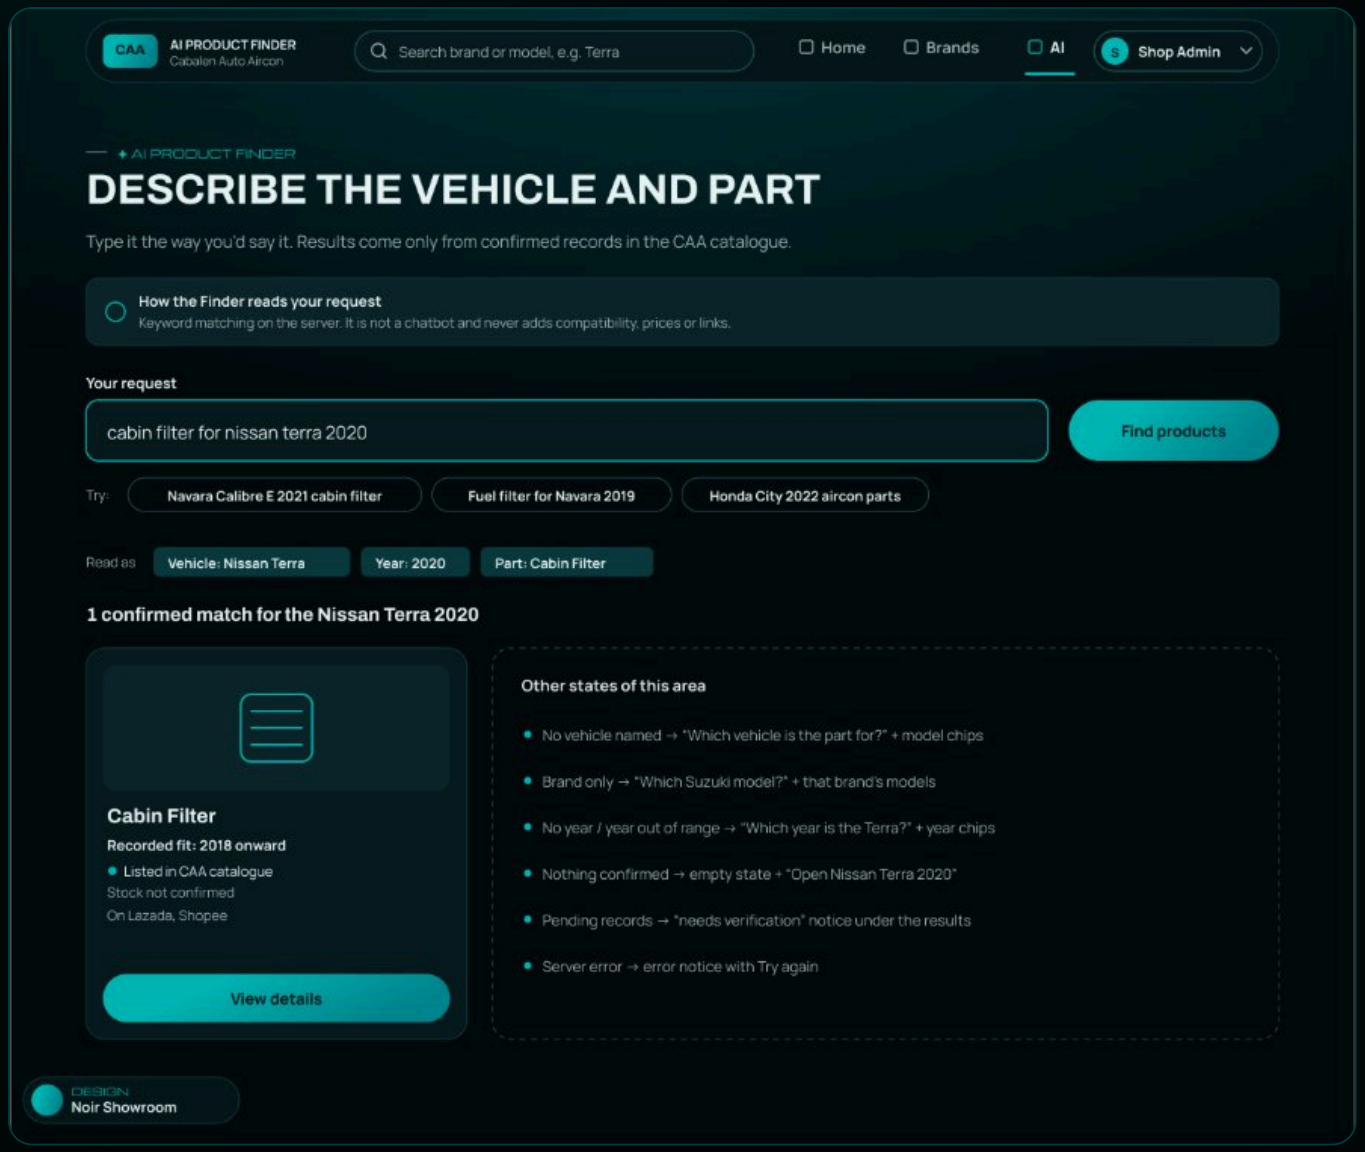

Item details: product info, recorded fit and the exact marketplace links.

Real content shown

- Cabin Filter for the Nissan Terra 2020.
- Lazada and Shopee open our listings; TikTok Shop shows as unavailable.
- Recorded compatibility table with years, status and the listing title as source.

`assets/mockup-05-item-details.png`

AI FINDER

In the proposal

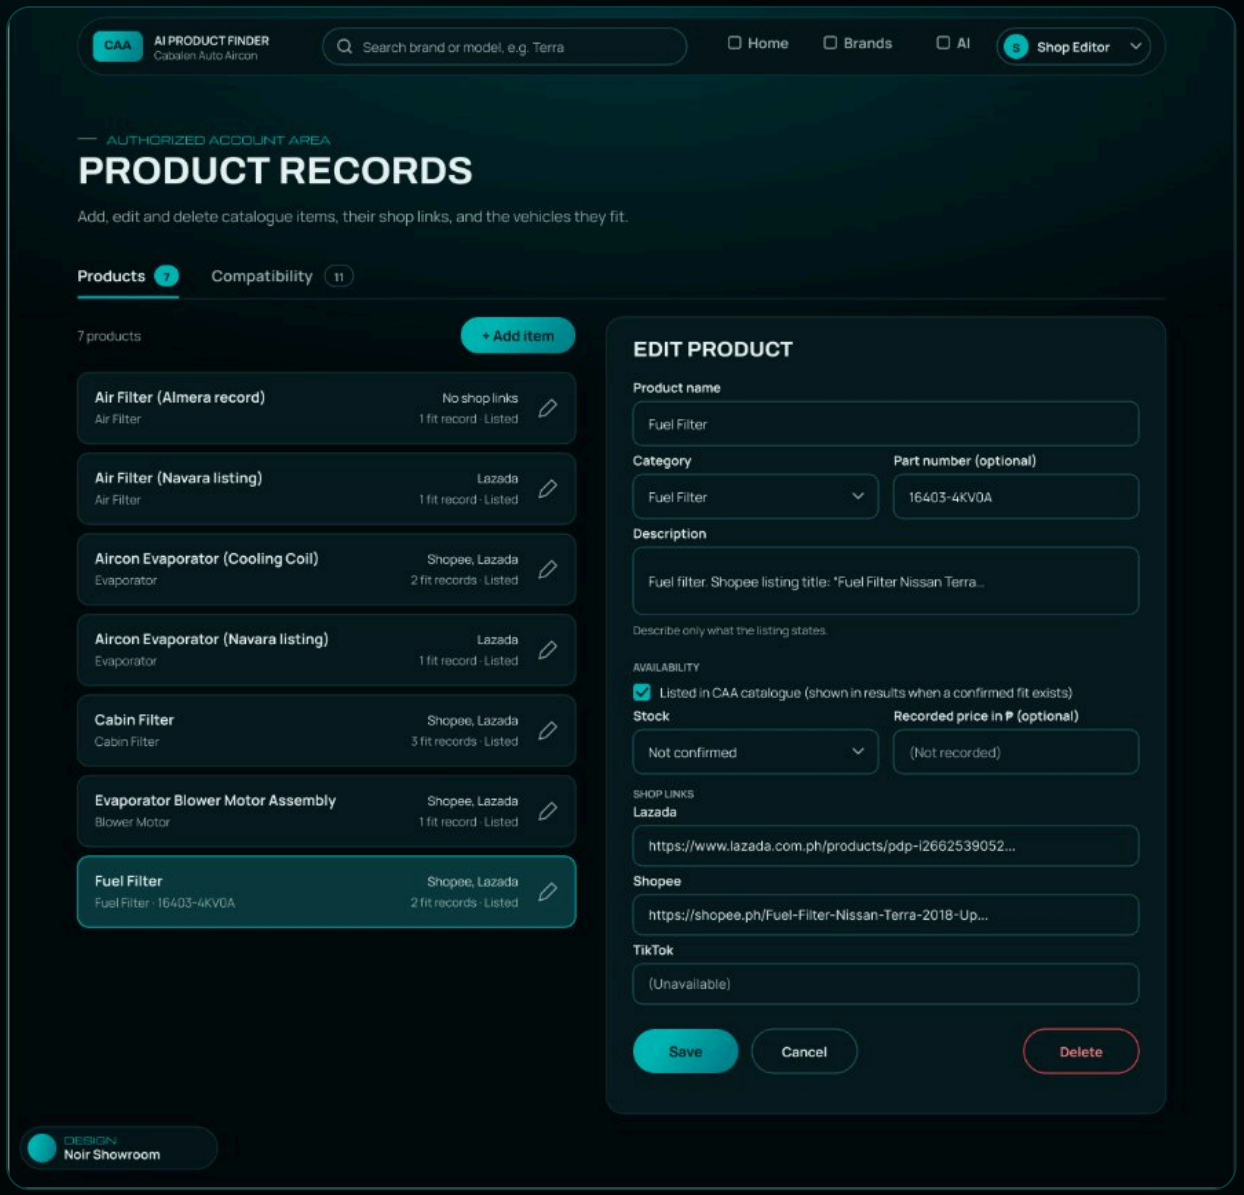

Finder that reads a request like “cabin filter for terra 2020” and searches our records.

Real content shown

- Request: “cabin filter for nissan terra 2020”, read as Vehicle Nissan Terra, Year 2020, Part Cabin Filter.
- Example chips: Navara Calibre E 2021 cabin filter, Fuel filter for Navara 2019, Honda City 2022 aircon parts.
- States list: missing vehicle, brand only, no year, nothing confirmed, pending records, server error.

`assets/mockup-06-ai-finder.png`

PRODUCT RECORDS

In the proposal

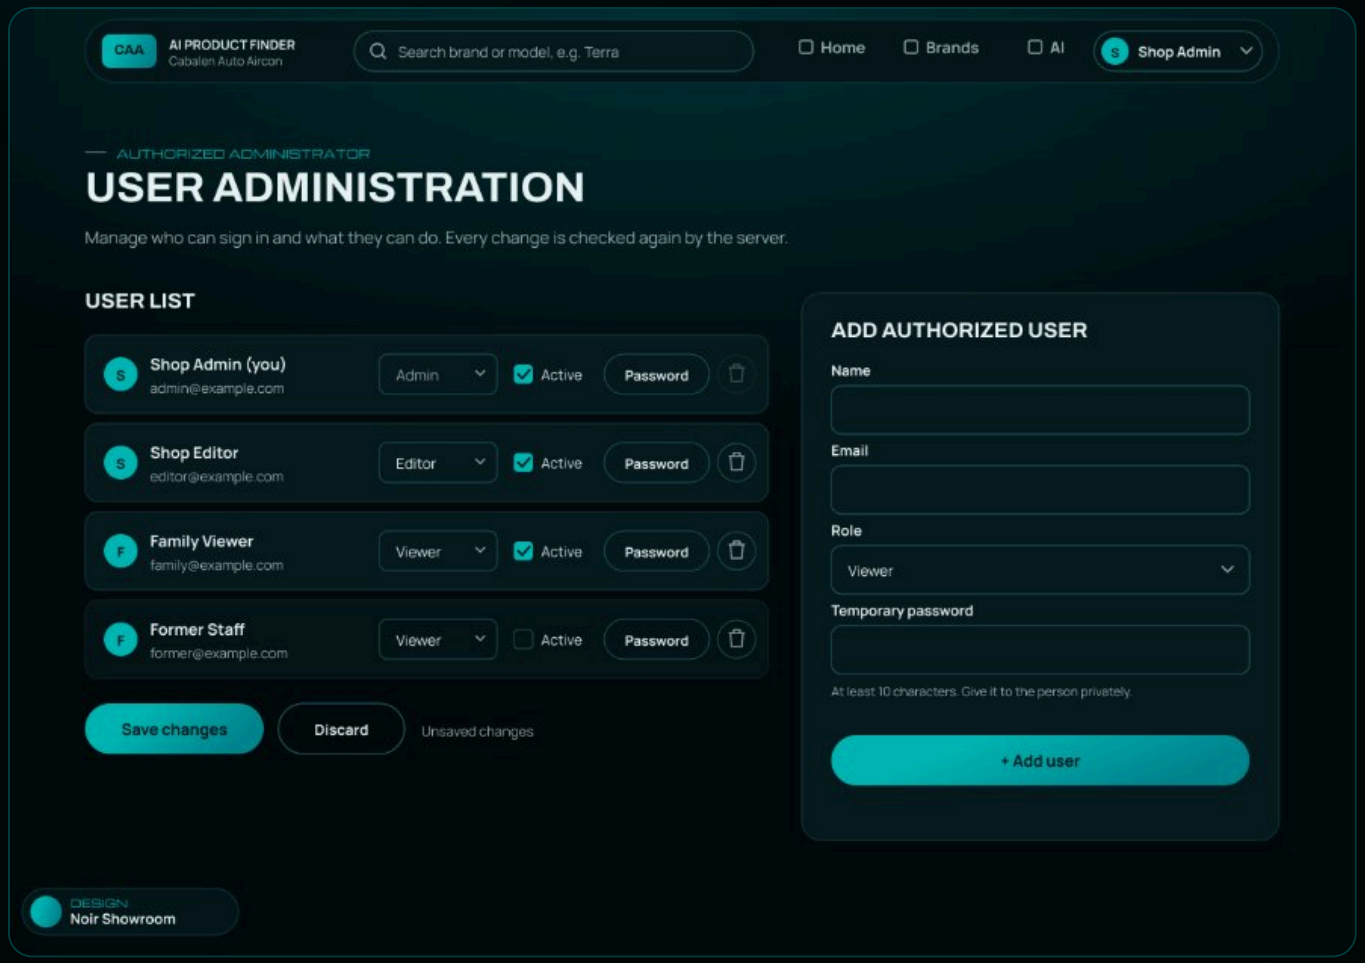

Product records: add, edit and delete products, shop links and fit records.

Real content shown

- Products and Compatibility tabs with counts.
- Edit form for the Fuel Filter: category, part number 16403-4KV0A, stock, Lazada and Shopee links.
- Save, Cancel and Delete actions.

`assets/mockup-07-product-records.png`

USER ADMINISTRATION

In the proposal

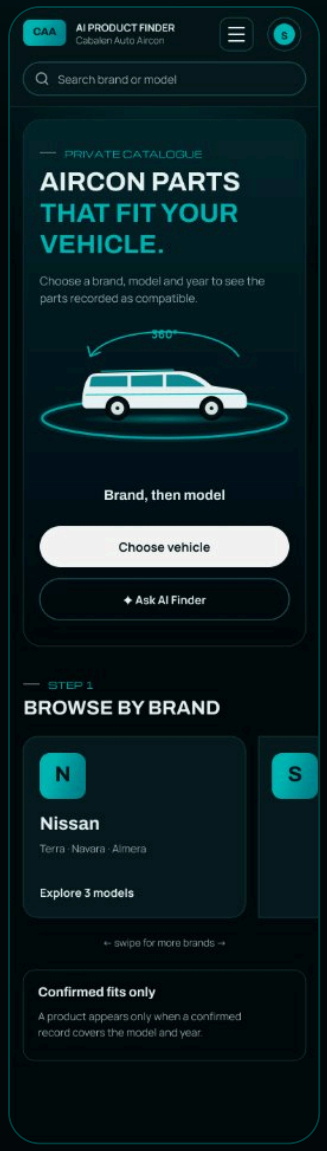

User administration: add users, change roles, turn accounts off and reset passwords.

Real content shown

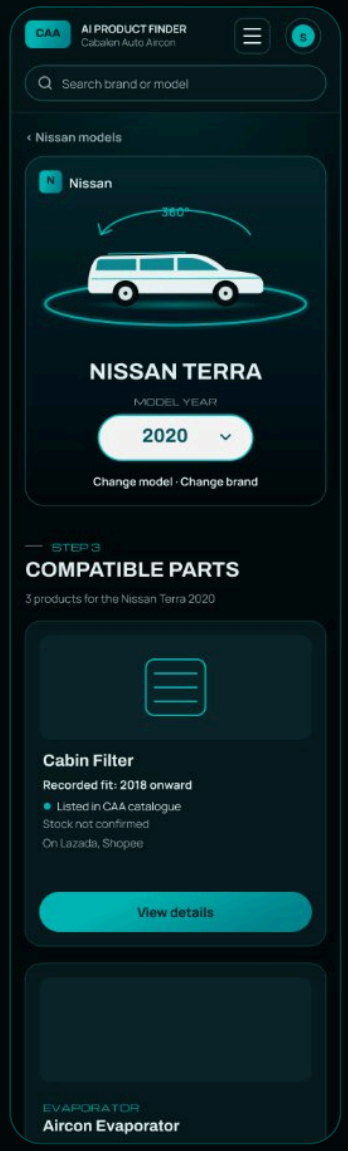

- User list: Shop Admin (you), Shop Editor, Family Viewer and an inactive Former Staff account.
- Role picker, Active checkbox, Password reset and delete on each row.
- Add authorized user form with a temporary password (10+ characters).

`assets/mockup-08-user-administration.png`

ON A PHONE

HOME

VEHICLE AND COMPATIBLE PARTS

What changes on a phone

- The header collapses to the logo, a menu button and the account button. Quick Search moves to its own row.
- The hero stacks: headline, car, then full-width Choose vehicle and Ask AI Finder buttons.
- Brand cards become a swipe row (“swipe for more brands”).
- Part cards drop to one per row, and View details stays full width so it is easy to tap.
- The year picker stays large and centred under the model name.

MOCKUP COMPARED WITH THE BUILT APP

Every screen in the mockup exists in the built app. These are the places where the picture and the finished app differ, for the journal:

Catalogue numbers	The mockup shows the earlier data: 7 products, 11 fit records, Almera with “No parts yet” and Navara with 2 parts. The built app has 27 products, with confirmed parts for every model.
Brand badges	The mockup uses letter badges (N, S, H). The built app shows the Nissan, Suzuki and Honda logos.
Car pictures	The mockup draws flat car illustrations. The built app shows real 3D models for all nine vehicles; the proposal had planned only the Terra.
Needs verification bar	Shown on the vehicle page in the mockup. In the built app it only appears when a model has unconfirmed records; with the current data there are none.
AI Finder	The mockup describes keyword matching, which is what was built. Gemini (planned in the proposal) is not connected yet.

Checked against the repository at commit 9c43b6a (11 October 2026) and its README. Confirm on the deployed site before submitting.
